

Carefree LIVING Memory Care Unit

Carefree Living is proud to announce the opening of our new 15-bed Memory Care unit. This secured area is planned for the second floor's west wing.

Our Philosophy

We have designed our memory care unit with a cozy and quaint setting. By having a separate kitchen and living room, a comfortable home-like setting is created.

Although our memory unit is secure, it allows our residents to enjoy outdoor activities. Many activities outside of the building are implemented for the resident's enjoyment.

Hospice will be incorporated into our care plans to allow residents to stay in one familiar setting until the end of life.

Why we're better

Carefree Living has a long, solid history of providing nothing but the best care for their residents. In our effort to become the best memory unit in the Brainerd area, we incorporate these beliefs:

- All memory unit staff receive special training and is required to attend ongoing training quarterly
- High ratio of caregiver to resident with more one-on-one time
- Daily activities scheduled every 30 minutes throughout each and every day
- Residents are encouraged to help with some daily activities such as setting the table, sweeping or folding laundry
- We provide sliding scale insulin coverage
